FUNCTION AROUND
WEANING**

CAREFREE WEANING, THE BASIS FOR A HEALTHY FATTENING PIG

Weaning is the most critical moment for any piglet. Inadequate feed intake shortly after weaning is the main cause of gut damage. This can lead to disorders of the digestive system and other health problems.

Each piglet must eat sufficient solid feed before weaning and learn to digest it.

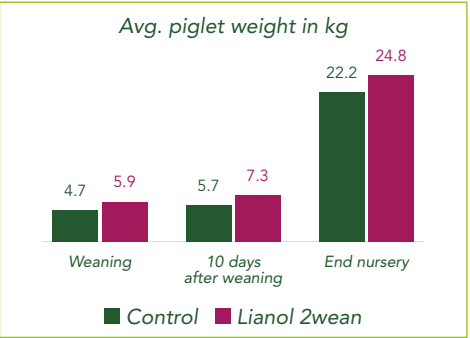

Successful weaning is only possible with proper preparation and a minimum of stress. Each piglet must eat sufficient solid feed before weaning and learn to digest it. This ensures that the gut is and remains in top condition at weaning. Weaning without a dip is highly beneficial throughout life.

Lianol 2wean is a concentrate/top dressing that binds pathogenic germs and mycotoxins. It promotes digestion, strengthens the immune system, and makes energy management more efficient. By providing it to the piglets in the farrowing pen from eight days of age until ten days after weaning, it contributes to smooth digestion, balanced intestinal flora, and good growth. This makes Lianol 2wean a logical final step in the preparation for weaning and further rearing. Together with Lianol basdiar, it results in robust, uniform, well-growing piglets and fatteners.

- Lianol 2wean around weaning:
- favors a stable gut flora
 - gives less stress after weaning
 - provides better growth in the fattening phase
 - gives a better return

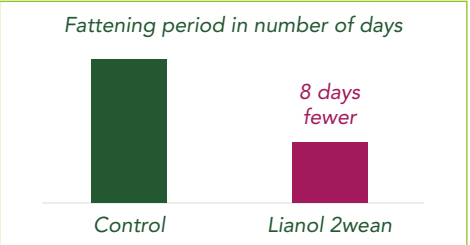

LIANOL 2WEAN; FOR LESS WEANING STRESS AND UNIFORM LITTERS

Higher growth in nursery

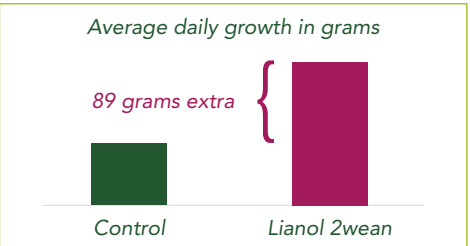

Measured variable: 650 piglets

Shorter fattening period

Measured variable: 2,827 piglets

Higher growth rate in fattening period

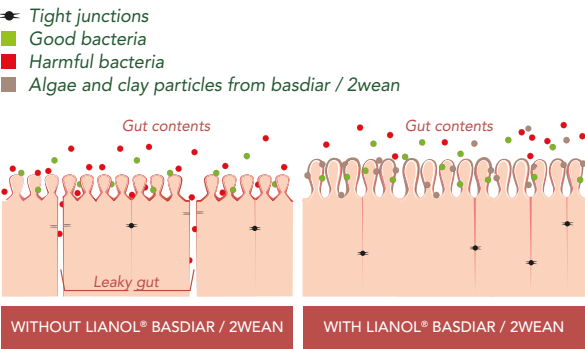

Measured variable: 2,827 piglets

Clay minerals and algae

Lianol basdiar and Lianol 2wean contain clay minerals, algae, dextrose, iron and selenium among others. These ingredients ensure a fast development of the small intestines (large intestinal villi through clay minerals) and better digestion (through algae and clay minerals). In part because algae and clay particles form a protective layer on the intestinal villi. Pathogenic bacteria are captured and leave the body via the faeces before they can be harmful.

USE OF LIANOL 2WEAN

Lianol 2wean is available as top dressing and concentrate.
